

SubContractor™ Series SC-15 Subwoofer

Velodyne Acoustics, the #1 rated subwoofer company for over 20 years, now offers the SubContractor Series - a powerful, easy-to-install line of subwoofers with an outboard, rack-mountable amplifier specially designed for any custom installation need.

The SC-15 may be the most compact 15" subwoofer cabinet anywhere. Its shallow depth and flush rear panel allow for easy placement. It connects to the SC-1250 amplifier with conventional speaker wire, for maximum placement flexibility. The SC-15 can be placed facing downward, for venting through the kick plate of a custom cabinet. No other subwoofers offer the compact, powerful, low-distortion bass of the SC Series!

Features

- Outboard amplification for ease of placement using conventional speaker wire
- Small and shallow – just 18 3/8" x 18" x 13 3/8" (HWD) including grill and feet
- Front-firing, sealed cabinet can be placed down-firing (feet included)
- Elegant black pica finish
- The matched SC-1250 amplifier can power one or two SC-15 subs (amp sold separately)

Powerful, Linear Drivers

The SC series employs Velodyne's multi-layer, Kevlar reinforced, resin cones mounted in die-cast aluminum baskets with massive magnet structures. Each driver incorporates Velodyne's unique dual-wound voice coil that assures linear travel and allows for the heat dissipation needed to handle the gigantic power output of the SC-1250 amplifier.

Easy to Install and Configure

Placement of the SC-15 is easy due to its compact size, outboard amplifier, and recessed speaker wire connector. The SC-1250 rack-mountable amplifier features 3000 watts dynamic power and 1250 watts of continuous RMS power. The SC-1250 also comes with DSP control, a built-in 7-band automatic room EQ, 12-volt trigger, IR repeater jack, RS-232 control port (Crestron Certified), and a full-featured remote with factory listening presets. Standard speaker wire is used to connect the SC-1250 to the SC-15. The SC-1250 can power up to TWO SC-15 subs.

The SubContractor Series Subwoofers — a sub for every situation.

You'll be blown away by the *hidden thunder* of the SubContractor Series subs!

Specifications	SC-15 Subwoofer
Woofer:	15" forward firing (12.7" piston diameter)
Frequency Response: (+/-3 dB)	22-120 Hz
Harmonic Distortion:	<5% (typical)
Magnet Structure:	346 oz. Ferrite (21.6 lbs)
Voice Coil:	3" Dual Layer inner/outer wind
